# Streakify - Defect Screenshots & Reports

System Defect Documentation | Test Cases 8, 11, 12, 13, 15

## DEF_STR_008 — Task created without selecting mandatory time fields

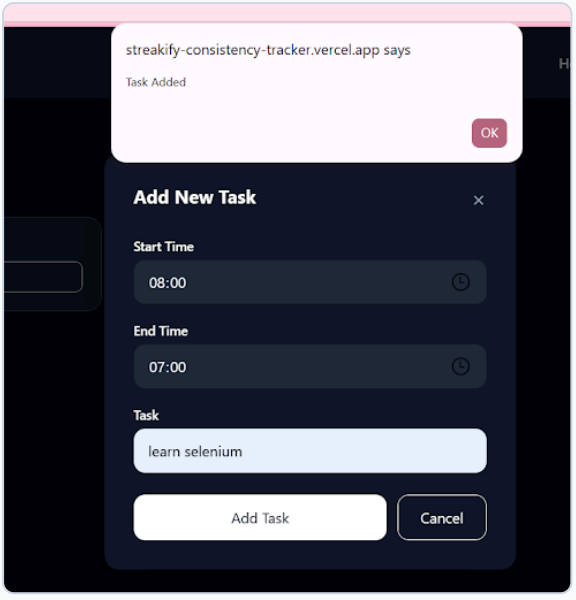

**Module:** Add New Task

**Issue:** System accepts empty time inputs ("--:--") for both Start Time and End Time and displays "Task Added" popup.

**Expected Result:** Proper validation should trigger requiring valid Start Time and End Time selections.

## DEF_STR_011 — Invalid time logic (End Time earlier than Start Time) accepted

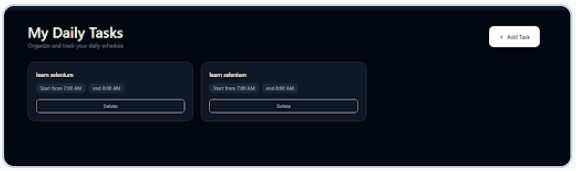

**Module:** Add New Task

**Issue:** System allows Start Time (08:00) to be later than End Time (07:00) and confirms task addition successfully.

**Expected Result:** Validation error should prevent End Time from being earlier than Start Time.

## DEF_STR_012 — Duplicate task cards created without validation

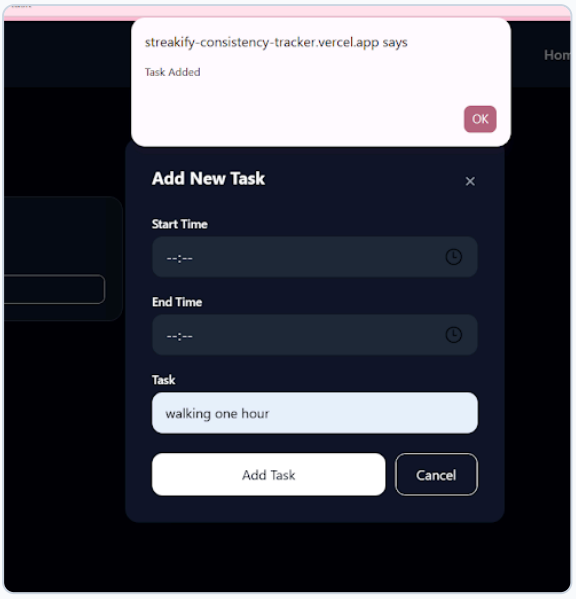

**Module:** My Daily Tasks

**Issue:** Duplicate tasks with identical names ("learn selenium") and identical time slots can be created concurrently.

**Expected Result:** System should detect duplicate entries or warn the user before creating identical task schedules.

## DEF_STR_013 — Task created with empty time fields and filled task name

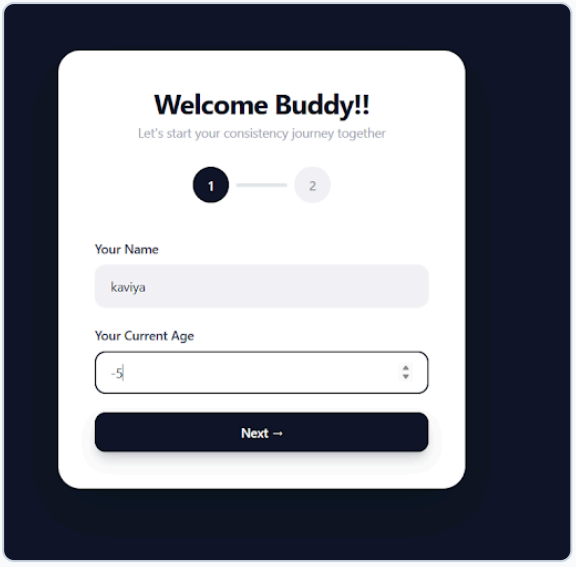

**Module:** Add New Task

**Issue:** Task title "walking one hour" gets added successfully despite missing both Start and End time parameters.

**Expected Result:** Form should enforce complete field submission prior to accepting new task data.

## DEF_STR_015 — Negative value allowed in Age field during onboarding

**Module:** User Onboarding (Welcome Buddy)

**Issue:** The "Your Current Age" field accepts negative integers (e.g., "-5") without triggering input validation errors.

**Expected Result:** The age input field must enforce positive numeric values within a valid range (e.g., 1–120).
